WEATHER OF CONCERN

Weather of Concern

- Several storms will impact portions of Northern and Southern California throughout the weekend.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

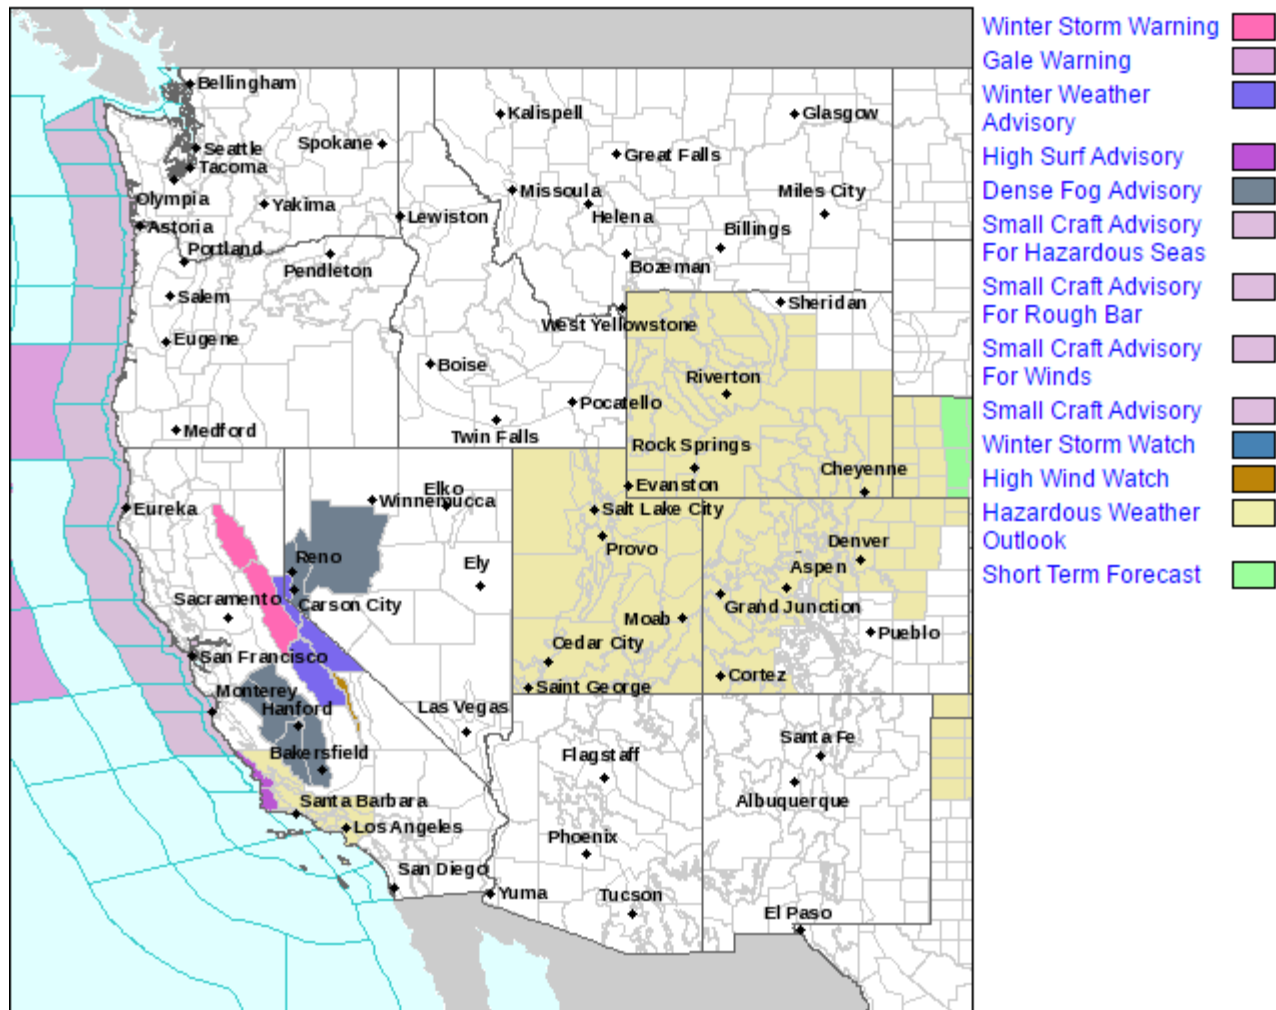

NORTHERN CALIFORNIA

Scattered showers across Northern California today, heaviest across Shasta County. Next weather system moves in overnight into Sunday with another batch of precipitation and gusty winds. This system will be colder so snow levels will fall to around 6000 feet during the afternoon and evening hours. Snow could be heavy at times, leading to hazardous mountain travel and likely travel delays. Afternoon thunderstorms are also possible Sunday across Shasta County and the Valley with small hail and gusty winds. Scattered showers will linger, mainly across the mountains during the day on Monday with another system moving in after dark. The second in a series of Pacific Storms will move through Central California this weekend. This system will be colder than the first, therefore snow over the Sierra Nevada is expected.

SOUTHERN CALIFORNIA

Another trough of low pressure will be impacting California Saturday night through Sunday bringing a slight chance of showers to Southern California, with most of the heavy rains and mountain snows remaining to the north. An area of low pressure along the coast of Central California will keep pleasant temperatures in place for the weekend. There will be a slight chance of showers Sunday, with the best rainfall chances near the coastal slopes. Any accumulations should be light.
